2013 SYM HD200

SYM is one of the worlds largest manufacturers of moto scooters. Since it s introduction to the US market in 2006, the SYM HD200 has built a reputation for not only being the most innovative scooter in the country, but also one of the most robust. Unlike other brands that still use dim 35W lights, the HD s 60W halogen headlight turns your night into day. SYM is the only scooter manufacturer that applies the ceramic coated cylinder technology in their scooters, a technology typically reserved to high end luxury cars. Ceramic coated cylinders produce less friction, which result in longer engine life. Additionally, the water cooled engine of the HD200 produces 16.5hp with a top speed of over 70mp/h. Dual disc brakes round off the elegant design and high end engineering. You are truly getting a premium segment scooter without having to pay the price for one.

Features:

Power: 16.5 hp
Top Speed: 74mp/h
Headlight: 60W Halogen
Dual disc brakes
Gasoline mileage: ~80mp/g
Ceramic coated cylinder
4-valve technology
